

## Upgrade introductions (USB-C Cable)

### Preparations:

1> Download the tools and extract it, and run 'setup\_v2.0.8.exe' to install the necessary tool for Vim upgrading:

### Steps as following:

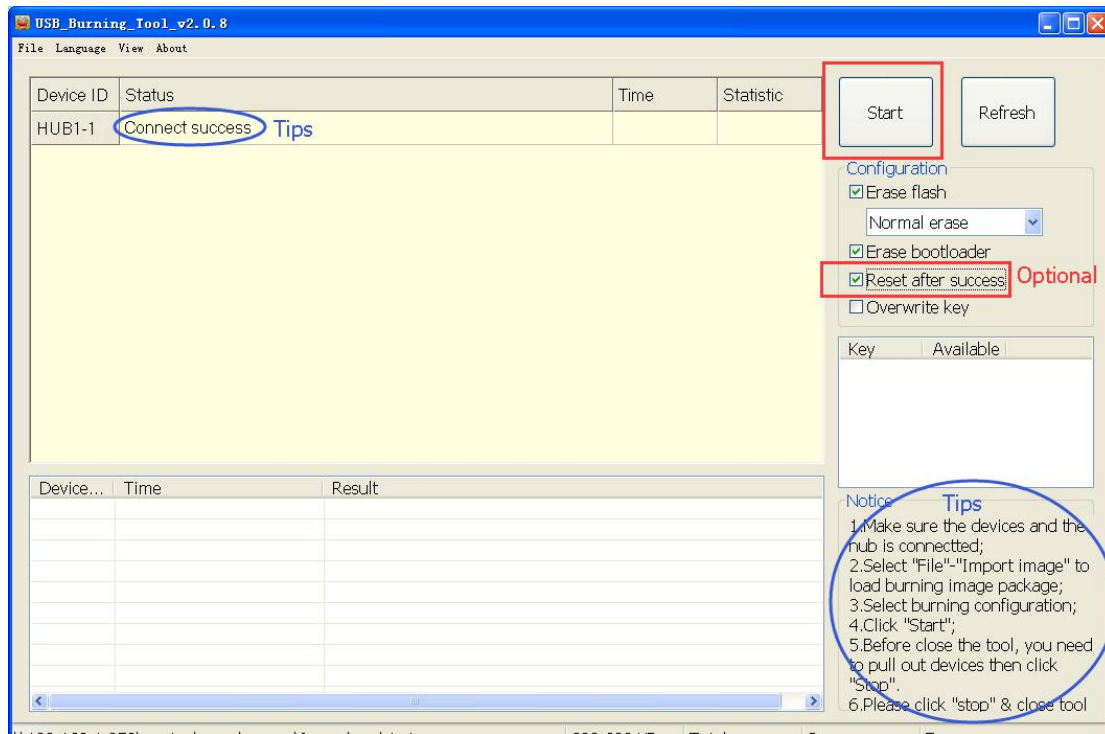

1> Open 'USB\_Burning\_Tool\_v2.0.8.exe', click 'File-->Import image' to chose the image for Vim.

2> Connect Vim and PC with an USB-C cable, and power on Vim.

3> Let Vim enter into upgrade mode to complete the upgrading:

- Long press 'Power' key without release
- Short press 'Reset' key and release
- Count 2-3 seconds and release the 'Power' key to enter into upgrade mode

4> Make sure your PC have found Vim device as upgrade mode, then click 'Start' button of the tool to start upgrading:

Tips: Click 'Stop' button first then close the tool to quit upgrading operation.

Have Fun!
